RefWorks 2.0
https://refworks.scholarsportal.info/refworks2/

- Bibliographic management program (bibliography can be created in almost any style)

- Reference List can be shared with other RefWorks users (RefShare)

- User-friendly (format a paper and create a bibliography/reference list in one step using Write 'n Cite!)

- Create unlimited folders (and subfolders) with unlimited references of research results, available online and accessible from virtually anywhere with an Internet connection!

Launching into RefWorks From Home

- If using RefWorks offsite, you must enter the **Group Code** before proceeding. Note that the group code is case-sensitive.

Creating a RefWorks Account

Signing Up for a RefWorks Account

- Click on *Sign up for a New Account* link
- ALL fields must be filled in

    - RefWorks is e-mail authenticated according to the institution licensing the product. Therefore, **please ONLY use your AHS e-mail address when registering.**

- **Area of Focus**: (select from drop-down menu)
- **Type of User**: (select from drop-down menu)
- Click on the **Create Account** tab

Creating Folders

- It is extremely important to create folders FIRST (before searching), because "the Last Imported folder (i.e. RefWorks server) contains ONLY references from your most recent data import that have not been filed in other folders!"

- **Click on the *New Folder* tab.**

- Enter file name (i.e. RefWorks); in the **Create New Folder** text box*;* click on the *Create* tab.

- After creating a new folder, you will be returned to your main RefWorks account home page. **To verify that the folder exists: View→View Folder** [the folder you just created should now be listed]

- RefWorks imposes NO LIMITS on how many folders or references you can have in your account

RefWorks: Creating Folders

Creating Subfolders

- Click on the **New Folder** tab
- Click on the **Create Subfolder** link
- **Input** the name of the subfolder, and choose which **Parent Folder** (drop-down menu) the subfolder will be located in.
- Click on the **Create** tab.

Sample Topic

Occupational exposure to asbestos, a cancer-causing agent

Direct Export MEDLINE→RefWorks

- Select desired results (place a check mark in the boxes next to the result number)

- In the *Results Tools* area, click on the *Export* tab.

- In the *Export Citation List* window, select **RefWorks** from the "Export to" drop-down menu, **Complete Reference** from the "Select Fields to Display" section. Include **link to External Resolver**.

- click on the **Export Citation(s)** tab.

Direct Export
MEDLINE→RefWorks (cont.)

Direct Export MEDLINE→RefWorks (cont.)

- A message should appear on the Import References screen, indicating that the references have been imported.

- At this point, the references are residing in the Last Imported folder. To move them to a folder in your account, click on the **View Last Imported Folder tab.**

Last Imported Folder

Last Imported Folder

- From the Last Imported Folder, place the selected reference(s) in the desired folder.

Direct Export
CINAHL→RefWorks

- Select desired results by clicking on the *Add to Folder* link.

- Click on the yellow *Folder* icon.

- In the *Folder Contents* window, select the desired article(s), and click on the *Export icon.*

Direct Export
CINAHL→RefWorks (cont.)

Direct Export CINAHL→RefWorks (cont.)

- In the ***Export Manager* window:**
  - Select the appropriate bibliographic management program (i.e. Direct Export to RefWorks)
  - Check the box, "remove these items from folder after saving"
  - Click on the ***Save* tab**

Direct Export
CINAHL→RefWorks (cont.)

RefWorks & PubMed

- In your search results, select the citations that you would like to import into RefWorks

- From the *Send to* drop-down menu, select the *File* radio button under the **Choose Destination** option.

- Select **MEDLINE** from the **Format** drop-down menu

- Click on the **Create File** tab.

- A File Download dialogue box will now appear, prompting you to either save or open the file

- Save the text file (.txt) (Desktop, My Documents, USB flash drive)
  - Rename your file to something more meaningful (i.e. malaria.txt)
  - The file extension **must** be in .txt format, otherwise the citations will not import into RefWorks
  - The text file can be saved on a USB memory stick as well

RefWorks & PubMed (cont.)
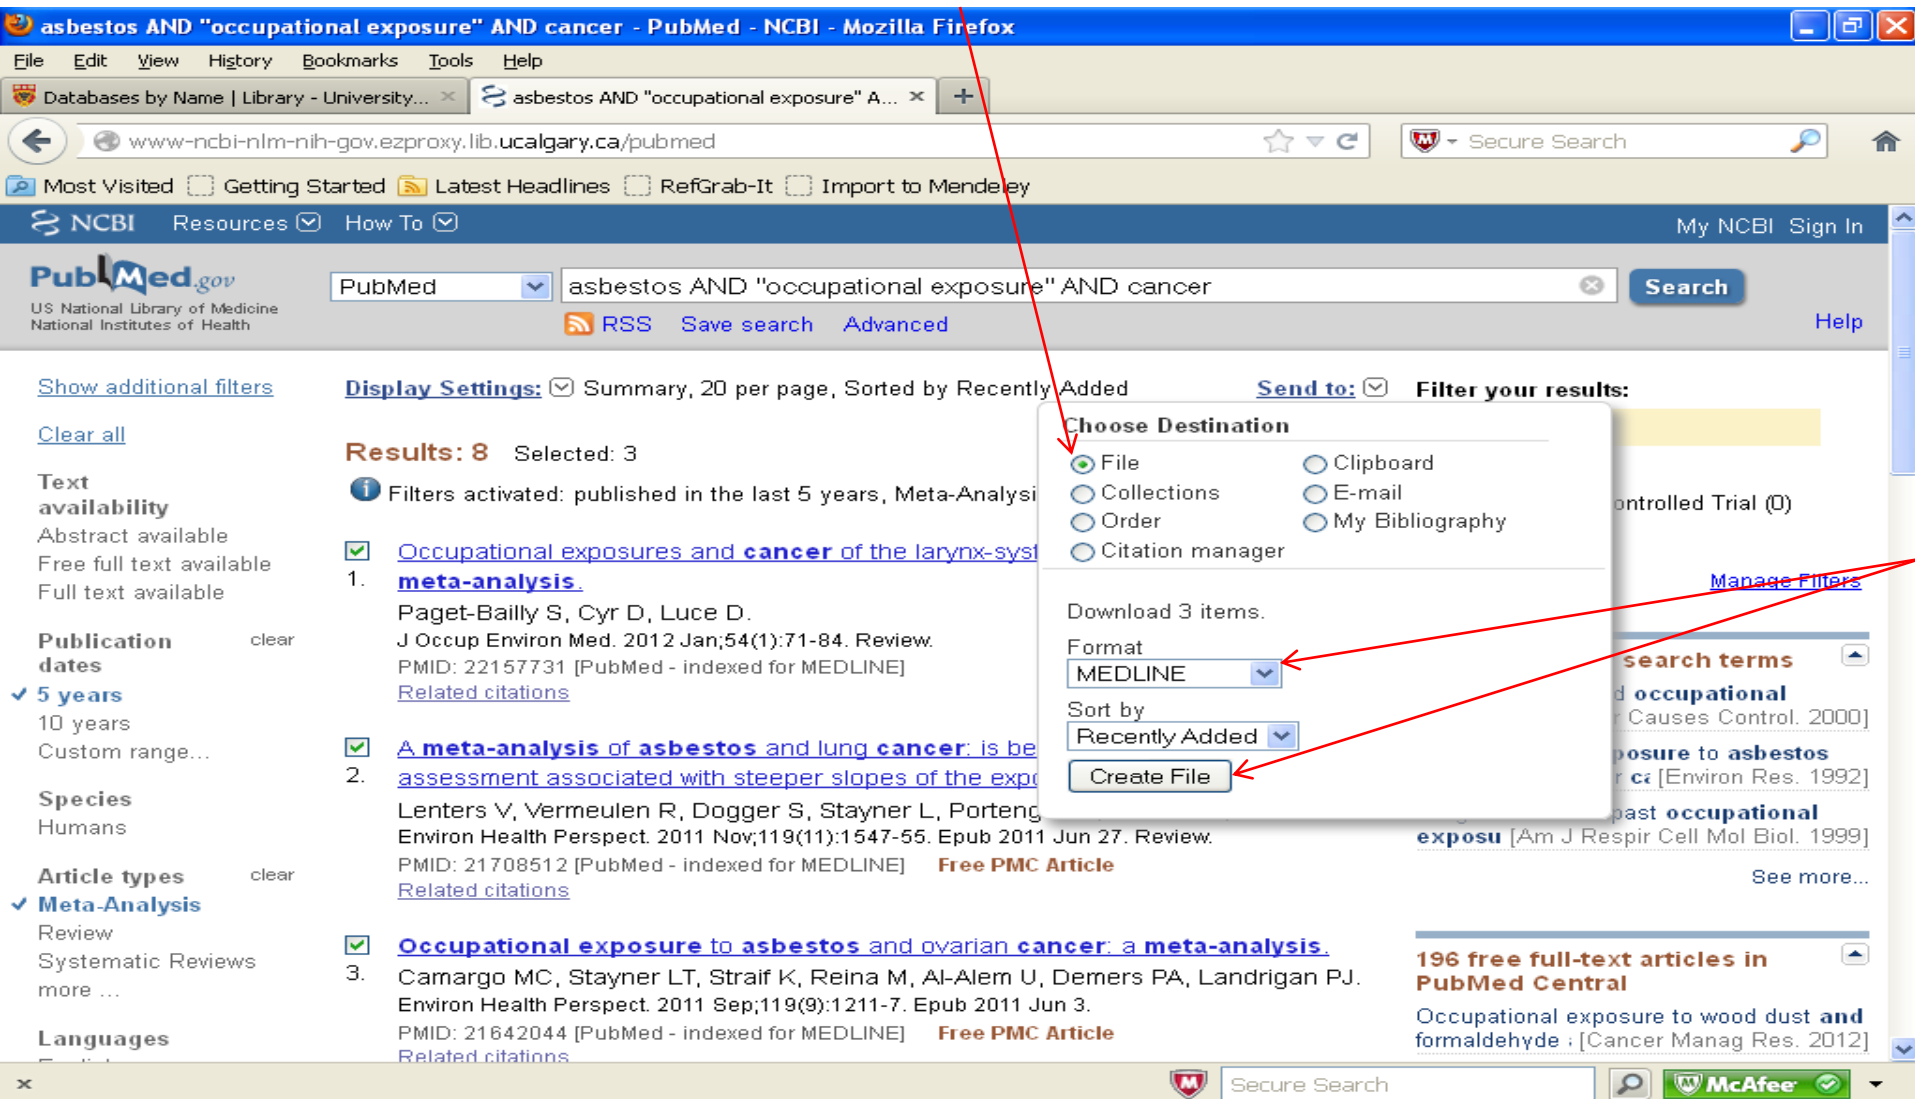

PubMed: Saving the Results into a Text (.txt) File

File Download

Do you want to open or save this file?

Name: pubmed_result.txt

Type: Text Document

From: www.ncbi.nlm.nih.gov.ezproxy.lib.ucalgary.ca

Click on Save, rename the file (if desired), and selected the location where the file will be stored (Desktop, My Documents, USB key)

[Open]   [Save]   [Cancel]

While files from the Internet can be useful, some files can potentially harm your computer. If you do not trust the source, do not open or save this file. What's the risk?

Importing Sources Into RefWorks
PubMed Step #1

- Log in to your RefWorks account

- Click on **References→Import**

- Select **NLM PubMed** from the **Import Filter/Data Source** drop-down menu. PubMed should now automatically appear in the **Database** drop-down menu below.

- Browse and **Select** the **Text File** (.txt) on the desktop where the PubMed results have been saved. Once selected from the location where the file is being stored (Desktop, My Documents, USB Key, etc.), this file name should automatically appear.

- In **Import Into Folder** drop-down menu, specify which folder (i.e. RefWorks) the file should be sent to

- Click on the **Import** tab

http://refworks.scholarsportal.info/refworks2/default.aspx?r=references%7CMainLayout::init#

Importing Sources Into RefWorks PubMed Step #2

- Click **Import**

- When receiving the message that the file has been imported successfully, you still need to move the references from the **Last Imported Folder** to the desired folder in your own account

- Click on **View Last Imported Folder**

- Select "all in list", and choose the desired folder from the drop-down menu. A screen containing the message "are you sure you want to put the three selected references into the [name] folder" will appear. Click on OK, and you will receive a confirmation message that the files have been successfully moved to the folder indicated.

Exploring RefWorks
References: Entering References Manually

- **New Reference** tab (or References→Add New)

- Under **Fields Used By**, select the desired citation style (APA, MLA, Vancouver, etc.), or **Access Output Style Manager** for a list of 1000s of journals!

- Under **Reference Type,** select the type of reference

- Type in information in the required fields

- Remember to **Save** the **Reference**!

Quick Access

Exploring RefWorks
Organize & Share Folders
- Create subfolders, rename, clear, or delete folders, check for duplicates

- **CAUTION:** If you accidentally clear a folder, these deleted references will be available (for a limited time): *View→Deleted References*

- **WARNING**, if you accidentally delete an entire folder, ALL content within this folder is lost!

Organize & Share Folders Options
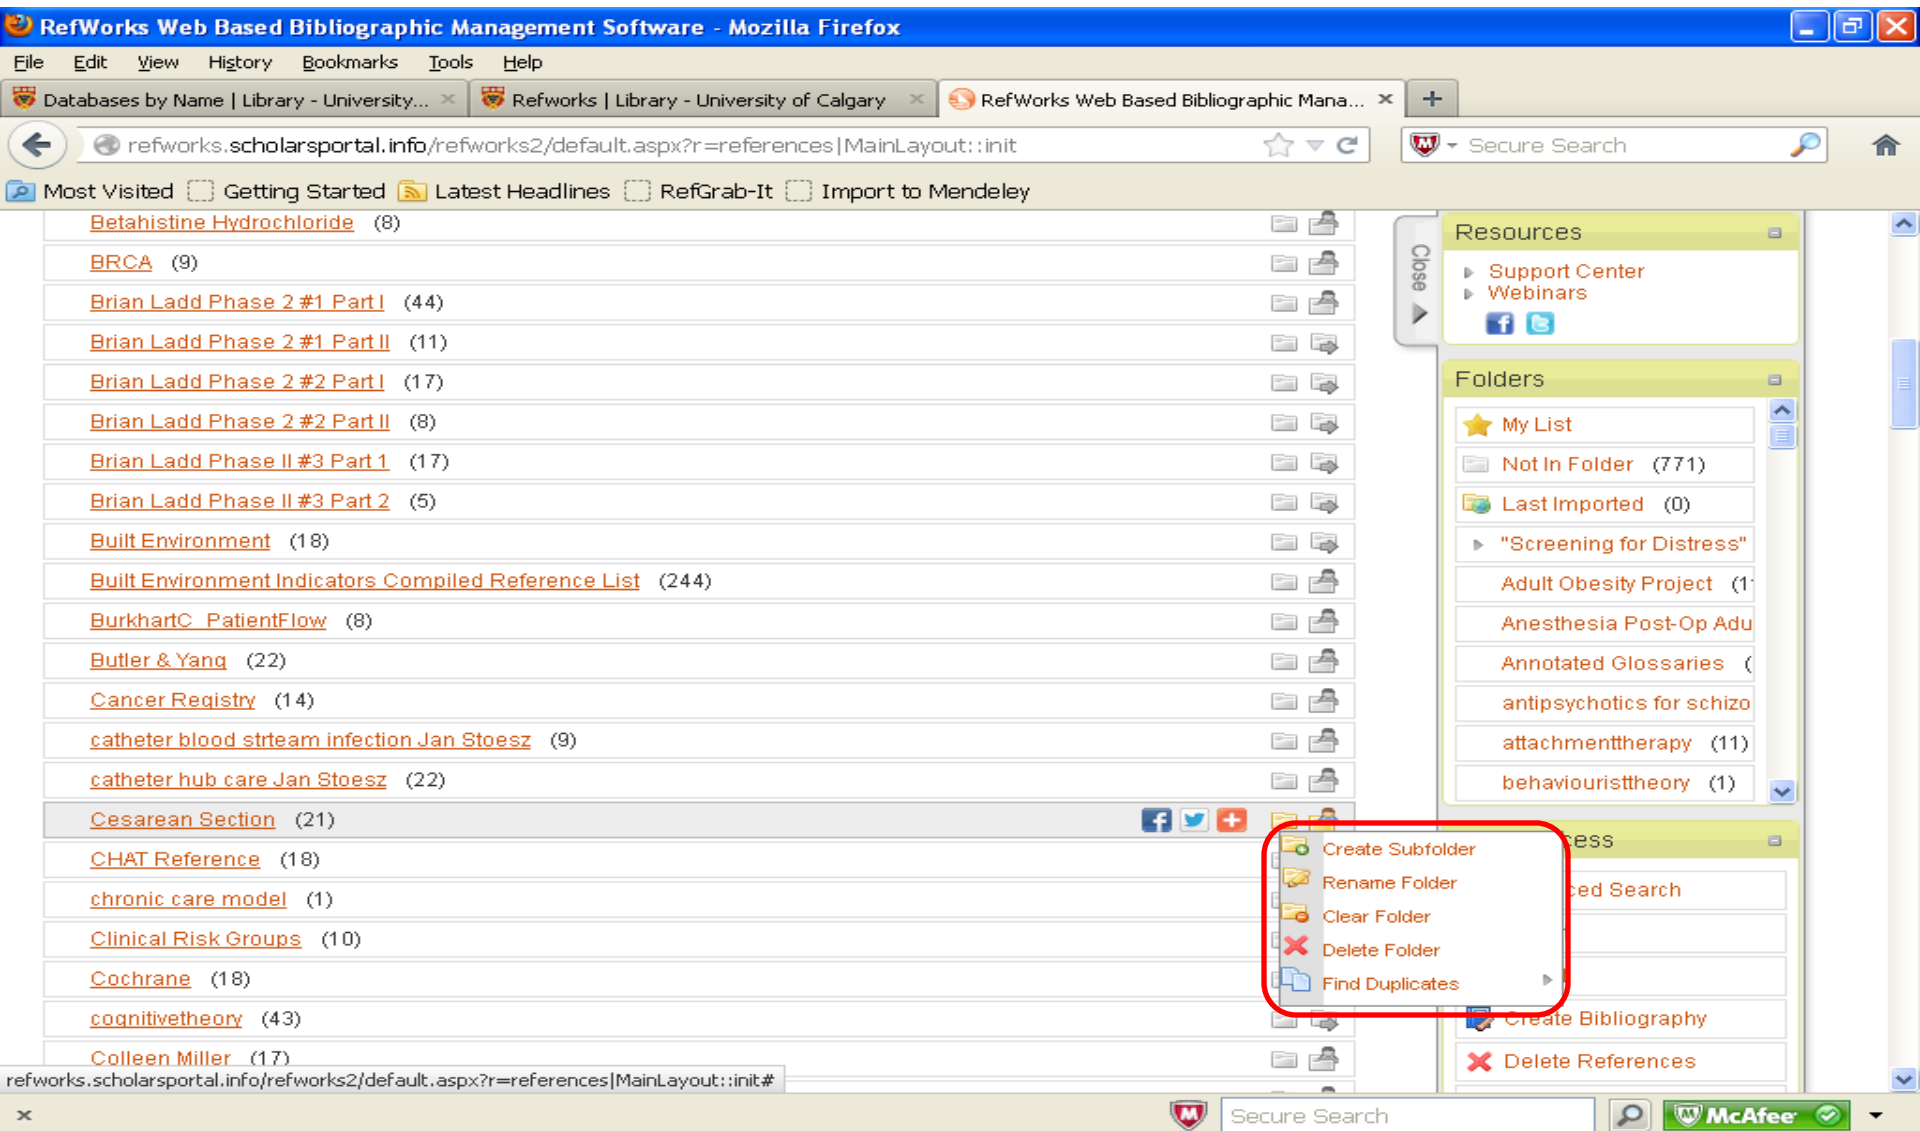

A Word on Duplicates

- Exact Duplicates
  - Absolute exact copy of a reference (character by character)

- Close Duplicates
  - Any discrepancies between abbreviation vs. full-form of journal title, page numbers, etc. will show up as a close match

- Search for duplicates within a particular folder or across your entire account

Exploring RefWorks
Searching Within Your Account

- Click on the *Search* menu tab
- You can search for citations within your account by:
  - Author
  - Descriptor
  - Periodical Title

- **It is now possible to search by document title, publication year, abstract, etc. by selecting *Advanced* from the *Search* menu tab. In addition, search strategies may be created and saved by combining multiple search fields together. Attachments (.pdf, .txt, and .doc file names) within your account are searchable as well**

Search Your Database

Search by Descriptor

Exploring RefWorks
Editing References

- Any reference within a folder may be edited by clicking on the **Pencil** icon.

- Although RefWorks captures the primary fields used by a specified citation style (including an abstract, where available), the option exists to add additional information in each reference (notes, customized fields, descriptors, etc.)

- Always remember to **Save Reference** if making any changes!

Edit Reference

Exploring RefWorks
Adding Attachments

- Attach PDF, Word (.doc), Text (.txt), or PowerPoint (.ppt) files to references

- *View*→*Folder*, and select the folder you wish to add an attachment to

- From the list of References displayed, click on the **pencil** (edit) icon next to the references for which the attachment is to be added

- Click on **Choose File,** select the desired file, and click on the **Add Attachment** tab

- Attachment size limit per file: 20MB [standard]

- Attachment size limit per account: 100MB [standard]

Adding Attachments

Exploring RefWorks
Sharing Folders: RefShare

- Click on the **Organize & Share Folders** tab.
- Select the folder to be shared by clicking on the *Share Folder* icon (yellow folder with green arrow), followed by the **Shared Folder Options** link.
- In the *Shared Folder Options* screen, under the **Share Information** heading, include a Title and, if desired, a brief synopsis of the folder in the Information field.
- Note: Leave the default checked fields as they are under the **Limitations** heading (note that the option to include attachments is NOT the default standard. This box must be checked and the preferences saved in order to take effect. Also, the user's e-mail should automatically appear in the email box. If not, it must be filled in before proceeding.
- Once all changes have been saved, click on either the **Share** Link or **Email this Share.**
- In the *Send E-mail* screen, fill-in the recipients e-mail address, and click on Send E-mail

Exploring RefWorks
RefShare: From the Viewpoint of the Recipient

When sharing a RefWorks folder, the recipient receives an e-mail similar to the following: Click on the embedded link to view the folder

http://refworks.scholarsportal.info/refshare2?site=010371133413200000/190-94-3NKCK71427486/NixonN_SubspecialtyInternalMedicineResidents_20120905

The sender of this email has granted you access to all or part of their RefWorks database of bibliographic references. Clicking on the link will take you to this database which is displayed in RefShare - the sharing module of RefWorks. The database owner has the option to allow you to print, export or generate a reference list from within RefShare. These options, if available to you, will appear in the main viewing area of RefShare. Additional information on this database, which is provided by the database owner, can be found by clicking About This Database from the menu bar. For more information on how to use RefShare, click on Help from the RefShare menu bar.

RefShare (cont)

After clicking on the embedded link, a RefShare screen, similar to the one presented here, will appear. While any user can view the contents of a shared folder, only users with a RefWorks account can export the references into their own folder(s). To do this, select the desired reference(s), and click on the *Export* tab.

Exploring RefWorks
Format Bibliography from List of References

- Click on the **Create Bibliography** tab
- Choose the desired **Output Style** from the drop-down menu
- Under ***References to Include,*** ensure that the All in List radio button is selected
- From the ***File Type*** drop-down menu, select ***Word for Windows*** (or ***Word for Mac)***
- Click on the ***Create Bibliography*** *tab*

Exploring RefWorks
Format Bibliography from List of References

Exploring RefWorks
Tools: Write-N-Cite

- ***Tools→Write-N-Cite*** (you will be prompted to download a small plug-in, i.e. an .EXE file). Please follow installation instructions carefully

- Write-N-Cite 4, the default and latest version available **is not recommended at this time**, due to various compatibility issues that often occur. Therefore, please use Write-N-Cite 3

- **Write-N-Cite 3** was designed for MS Word 2007 and MS Word 2010, running Windows Vista, and Windows 7 operating systems. However it is compatible with MS Word 2003 and Windows XP as well.

- A Write-N-Cite version for Mac users is also available (click on the **Write-n-Cite for Mac** link).

- **Please close MS Word BEFORE installing the Write-N-Cite plug-in**

Exploring RefWorks
Tools: Write-N-Cite

Write-N-Cite 2.0

It is no longer necessary to click on the Write-N-Cite icon in Word to cite while you write! Just copy and paste this citation into Word!

Write 'n' Cite Reminders

- In-text citations: copy and paste the RefWorks reference in the squiggly brackets directly into the Word document. Repeat for each and every citation!

- Save the Word document (with the squiggly brackets) as a separate file!

Write 'n' Cite (Word 2003, Word 2007)

Formatting a Document and Bibliography

- Click on the *Create Bibliography* tab
- Choose the desired **Output Style** from the drop-down menu
- Click on the *Format Document & Bibliography* link
- Browse and retrieve the desired document **with the squiggly brackets**
- Click on the *Create Bibliography* tab
- A message indicating "Bibliography Complete" should appear. Open the Word file.

Formatting a Document & Bibliography

Write-N-Cite: A Final Word

- Upon completion of the Format document and bibliography option, the generated Word document will be indicated as **Final** before the file name. This file can be edited just as in word, however…

- **Do not alter any of the in-text citations in the "Final" file. This must be done ONLY in the original squiggly brackets file, and then the format document and bibliography option MUST be repeated to generate the new, updated Word document**

Exploring RefWorks
Tools: RefGrab-It

- Captures bibliographic information from web pages, which can then be imported into a RefWorks account

To install RefGrab-It: *Tools→RefGrab-It* (you are given the option of installing RefGrab-It as a plug-in or as a bookmarklet)

- Please follow the on-screen instructions with regards to how to install the plug-in or bookmarklet.

- **note:** installing RefGrab-It as a bookmarklet is recommended, as the plug-in is currently only compatible with Internet Explorer and Firefox browsers (not available for a Mac)**

- Once RefGrab-It is installed, locate the desired web-page:
  - Plug-In: Right-click on the page that you would like to import, click on the RefGrab-It link
  - Bookmarklet: Select the RefGrab-It bookmarklet from your Favorites (Internet Explorer) or Bookmarks (Mozilla)

R

So
Fol

RefGrab-It is an optional feature for capturing bibliographic information from web pages. It is available in two versions -- a bookmarklet that works with either Internet Explorer or Firefox and downloadable plug-ins for Internet Explorer and Firefox.

RefGrab-It looks for information on web pages and if an ISBN number, PubMed ID or (digital object identifier) or COinS (ContextObjects in Spans -- special coding embedded in the web page that RefWorks will read) are on the web page, RefGrab-It will automatically take that information search various web resources (behind the scenes) to get supplemental information that may be of interest to you that you can also import. RefWorks may even locate RSS feeds related to that web page that you can invoke and import information from.

Note: RefGrab-It cannot be used on .pdf files from web sites.

When you use RefGrab-It on a web page, it automatically opens a "temporary results page" in a new window. You can view the information and additional resources first, then decide if you want to import the data.

Installing RefGrab-It

Click on the " ⓘ *Install Information* " link of one of the version to the right for more information on installing a specific version of RefGrab-It.

Using RefGrab-It

Information on using RefGrab-It can be found in the online help

For Microsoft Windows Only.

Compatible with Internet Explorer Version 6, 7, and 8.

Can automatically export RIS file downloads to RefWorks.

ⓘ Install Information   Download (1678k).

RefGrab-It Firefox Add-on

Compatible with Firefox Version 2, 3, and 3.5.

Can automatically export RIS file downloads to RefWorks.

ⓘ Install Information   Download (25k).

RefGrab-It Bookmarklet

Installs as a bookmark in your browser.
Compatible with Firefox and Internet Explorer.

Troubleshooting

- Please be consistent with regards to using the same version of Word when working with Write-n-Cite

- "Reference ___ was not found in your database"
  - http://unmc.libguides.com/content.php?pid=25174&sid=181492

- Should direct export not work in Ovid or EBSCO databases, saving references in RIS format is a universal standard that will work
